DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-23 and 28, drawn to a proximity monitoring system using magnetic field antennas, classified in class 343, subclass 788.
- II. Claims 24-27, drawn to method of forming a measure of a modulated magnetic field and a method of synchronizing a receiver data signal with a phase modulated magnetic field, classified in class 340, subclass 572. The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are distinct such that group I is a proximity monitoring system using magnetic fields, and group II define methods of signal measurement and, correlating and synchronizing in a magnetic field wireless pet containment system. These inventions are distinct by classification in different classes and the methods are not required for the system of Group I.

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Michael C. Wimer whose telephone number is (703) 305-3555. The examiner can normally be reached on M-F.
